BAUE EIN KLAVIER!

Das Klavier ist eines der beliebtesten Musikinstrumente der Welt, und mit dieser Bauanleitung kannst du dir ein eigenes Klavier bauen. Das erste Klavierinstrument wurde von Bartolomeo Cristofori, einem italienischem Instrumentenbauer, ungefähr im Jahr 1700 gebaut. Heutzutage gibt es verschiedene Klavierarten, wie zum Beispiel der Flügel und das Pianino (wie dieses hier). Ein anderes Wort für Klavier ist auch Pianoforte oder Piano.

Baue dieses Piano mit den Steinen aus deiner LEGO Sammlung.
